## PROFILE SUMMARY

As an experienced accounting assistant and an auditor, I have utilized my programming skills in Python to enhance my effectiveness in previous employment to facilitate my job/tasks. I am adept at utilizing data analysis to inform decision-making and have a keen interest in exploring predictive modeling. By combining my accounting background with data analytics, I aspire to become a data scientist, assisting organizations in making informed, data-driven decisions.

## PORTFOLIO/PROJECTS

Portfolio Website: <http://calgonzales.github.io/>

- Inventory Management Data Analysis (Data cleaning/wrangling, pandas, statistical analysis, visualization)
- PowerBI: Inventory Management Data Visualization

## WORK EXPERIENCE

### • Information Technology Auditor: Deloitte (Navarro Amper & Co.) (April 2022 – Present)

Adept at assessing IT systems for compliance with industry standards and regulations. Proficient in risk assessments, audits, and enhancing IT governance, risk management, and cybersecurity. Demonstrated ability to convey complex technical concepts to diverse stakeholders.

### • Accounting Staff: EasyPC Computing Inc (August 2021 – October 2021, 4-month contract)

Created a process automation of accounting workflow to enhance efficiency using Python.

### • Professional Development: Focused on CPA Studies (2020)

### • Treasury Assistant: AlphaLand Makati Place (March 2019 – June 2019)
